This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. UNITED STATES GOVERNMENT PUBLICATIONS.

MONTHLY CATALOGUE.

VOL. V. WASHINGTON, D. C., JANUARY, 1889. No. 1.

Entered as second-class matter at the Post Office, Washington, D. C.

This Catalogue contains the titles of all the current official publications of the United States, including the reports and papers issued by Departments, Bureaus, Commissions and other organizations of the Government; all the documents printed by order of Congress—that is to say, the Executive Documents, Reports of Committees, Miscellaneous Documents, Journals, and Debates of both Houses; and in addition, the titles of all public and private Acts, Treaties, Maps, and Charts.

The arrangement of the titles is alphabetical, under authors' names as regards special treatises, and under topics as regards Congressional documents. At the same time the Departments, Bureaus, Commissions, etc., are credited with the works issued under their supervision. A general Index at the end of the volume.

Subscription price $5.00 per annum.

J. H. HICKCOX,
906 M. ST. W., WASHINGTON, D. C.

William Wesley & Son, 28 Essex Street, Strand, or, Trübner & Co., 57 Ludgate Hill, London, or, G. Hedeler, Leipzig, are authorized to receive subscriptions.

It has been found quite impossible to keep pace with the rapid output of the Government press of 1888. Such a large quantity remains on hand that the titles will require the allotted space not only of the November and December numbers but much more, either in the form of extra, or great enlargement of the numbers still due. But it is deemed best not to delay on this account the issues of the 5th year, and therefore this first number of volume five is published in advance of the concluding numbers of volume four. No effort will be spared to bring the latter volume to a speedy conclusion.

The long delayed report of Alice C. Fletcher on Indian education and civilization has appeared. This report was communi-

cated to the Senate in February, 1885. It comprises "a historical résumé of the relations between the Indians and the American colonies prior to the War of the Revolution, and of the origin and progress of the Indian policy of the Government from that date to the present time, with statements respecting the agencies, reservations, lands, legal status, population, trade, and education of these wards of the nation."

Since the opening of the present session of Congress there has been some activity in the rooms of the Printing Committee in disposing of the resolutions accumulated from the previous session. Favorable reports have been made in a number of cases, the more important of which are here cited:

Uniform of the Army of the United States from the organization of the Government to the present time, in a series of plates, in portfolio form.
Lewis and Clark's expedition reports.
United States Map, by the Land office. New edition.
Naval Observatory Observations.
Standard Oil and sugar investigations.
The three volume report of the select committee appointed to investigate the Executive Departments.
Digest of contested election cases, H. R. (Continuation.)
Reports of the Board of Visitors to the United States Military Academy at West Point.
Annual reports of the Commissioner of Education, the Commissioner of Labor, the Regents of the Smithsonian Institution, the Health officer of the District of Columbia, and the Red Cross Association.

UNITED STATES GOVERNMENT PUBLICATIONS.

MONTHLY CATALOGUE.

VOL. V. WASHINGTON, D. C., FEBRUARY, 1889. No. 2.

Entered as second-class matter at the Post Office, Washington, D. C.

This Catalogue contains the titles of all the current official publications of the United States, including the reports and papers issued by Departments, Bureaus, Commissions and other organizations of the Government; all the documents printed by order of Congress—that is to say, the Executive Documents, Reports of Committees, Miscellaneous Documents, Journals, and Debates of both Houses; and in addition, the titles of all public and private Acts, Treaties, Maps, and Charts.

The arrangement of the titles is alphabetical, under authors' names as regards special treatises, and under topics as regards Congressional documents. At the same time the Departments, Bureaus, Commissions, etc., are credited with the works issued under their supervision. A general Index at the end of the volume.

Subscription price $5.00 per annum.

J. H. HICKCOX,
906 M. ST. W., WASHINGTON, D. C.

William Wesley & Son, 28 Essex Street, Strand, or, Trübner & Co., 57 Ludgate Hill, London, or, G. Hedeler, Leipsig, are authorized to receive subscriptions.

The publication of the 17th, 19th, 21st, and 22d volumes of the United States Census of 1880 completes this great work, the plan of which was laid out on a much broader scale than that of any of its predecessors. The low prices at which the volumes are placed on the market brings them within the reach of every one. Separate volumes may be had, as well as complete sets. A catalogue of the entire work will be found in the 3d volume of this Catalogue at pages 50–51.

The plan of the Census of 1890 has not yet been fully determined upon, but the indications are that it will be confined to a smaller range of subjects.

The Department of State has published in a handsome small quarto volume Letters of Joseph Jones of Virginia, 1777–1787.

The work is edited by Worthington C. Ford, from originals belonging to the estate of J. C. McGuire, late of Washington, and a few others found in the Washington and Jefferson collections in the Department of State. As remarked by the editor, "the correspondents of Judge Jones were men of note, the leading spirits of the day," and the interest of his letters "lies mainly in the careful picture he gives of the condition of Virginia politics subsequent to the treaty with Great Britain," and of "the steps that led up to the Federal Constitution." The edition of this work has been limited to a very small number of copies.

The literature of the Samoan and Haytian difficulties as far as developed by the present Congress will be found of interest.

General Greely's account of the United States expedition to Lady Franklin Bay has been issued in two attractive quarto volumes.

The late General Emory Upton, author of the Military Tactics now in general use, left unpublished at the time of his decease a work covering a complete analysis of the military records of the United States from the beginning of the Revolution to 1862, and a chapter on the military policy of the late Confederate States. The work is of great value to the students of history, and the Printing Committee of the House has reported in favor of its publication by the Government.

Reports have been submitted favoring the publication of extra copies of the following:

Hearing before the Committee on Education and Labor on S. 2983, known as the Sunday rest bill. 32,000 copies.

Interstate Commerce Commission. Second Annual Report, with appendices. 5000 additional copies.

Report of the Royal Commission appointed to inquire into recent changes in the relative values of the precious metals, with minutes of evidence and appendices, presented to both houses of Parliament by command of Her Majesty. 3000 additional copies.

UNITED STATES GOVERNMENT PUBLICATIONS.

MONTHLY CATALOGUE.

VOL. V. WASHINGTON, D. C., APRIL, 1889. No. 4.

Entered as second-class matter at the Post Office, Washington, D. C.

This Catalogue contains the titles of all the current official publications of the United States, including the reports and papers issued by Departments, Bureaus, Commissions and other organizations of the Government; all the documents printed by order of Congress—that is to say, the Executive Documents, Reports of Committees, Miscellaneous Documents, Journals, and Debates of both Houses; and in addition, the titles of all public and private Acts, Treaties, Maps, and Charts.

The arrangement of the titles is alphabetical, under authors' names as regards special treatises, and under topics as regards Congressional documents. At the same time the Departments, Bureaus, Commissions, etc., are credited with the works issued under their supervision. A general Index at the end of the volume.

Subscription price $5.00 per annum.

J. H. HICKCOX,
906 M. ST. W., WASHINGTON, D. C.

William Wesley & Son, 28 Essex Street, Strand, or, Trübner & Co., 57 Ludgate Hill, London, or, G. Hedeler, Leipzig, are authorized to receive subscriptions.

The compilation of the treaties of the United States with other powers since July 4, 1777, has long been in preparation at the Department of State. It has made its appearance in the form of a bulky volume of 1426 pages. Viewing it from a typographical standpoint, this important publication is no credit to the Government of the United States. It should have been uniform in size and quality of paper with the Revised Statutes and Statutes-at-Large.

Four additional volumes of the Fisheries and Fishery Industries of the United States, prepared by the United States Fish Com-

mission, have been issued, making in all seven volumes to date. This is one of the most important works ever published by the Government.

The following is a list of the publications ordered printed by the 50th Congress, in addition to the number provided by existing laws. This list aggregates about one million volumes. The number of volumes printed under provisions of existing laws, and not included in this list, being annual reports from the executive departments, is about one hundred and fifty thousand.

GOVERNMENT PUBLICATIONS,

AND INFORMATION CONCERNING SAME, SUPPLIED BY

J. H. HICKCOX,

WASHINGTON, D. C.

UNITED STATES GOVERNMENT PUBLICATIONS.

MONTHLY CATALOGUE.

VOL. V. WASHINGTON, D. C., MAY, 1889. No. 5.

Entered as second-class matter at the Post Office, Washington, D. C.

This Catalogue contains the titles of all the current official publications of the United States, including the reports and papers issued by Departments, Bureaus, Commissions and other organizations of the Government; all the documents printed by order of Congress—that is to say, the Executive Documents, Reports of Committees, Miscellaneous Documents, Journals, and Debates of both Houses; and in addition, the titles of all public and private Acts, Treaties, Maps, and Charts.

The arrangement of the titles is alphabetical, under authors' names as regards special treatises, and under topics as regards Congressional documents. At the same time the Departments, Bureaus, Commissions, etc., are credited with the works issued under their supervision. A general Index at the end of the volume.

Subscription price $5.00 per annum.

J. H. HICKCOX,
906 M. ST. W., WASHINGTON, D. C.

William Wesley & Son, 28 Essex Street, Strand, or, Trübner & Co., 57 Ludgate Hill, London, or, G. Hedeler, Leipsig, are authorized to receive subscriptions.

The separate contributions contained in the fifth section, or, volumes five, six, and seven of The Fisheries and Fishery Industries of the United States, are given prominence in the following pages. The contents of the previous volumes have been similarly treated. This work has greater general interest than is usually credited to Government publications. The natural history of fishes, their geographical distribution, the fishing grounds, the fishermen, the history and methods of the fisheries, have all been elaborated with so few technicalities as to make really delightful reading. The engravings which are not confined to scientific delineations are instructive, and many of them very spirited. The statistical portion is based on the returns of the Census of 1880,

which were turned over to the Fish Commission, and extended by investigations to a later date. The volumes being uniform in size and outward appearance with those of the Census, they really constitute as much a part of it as any of the monographs which make up the twenty-two volumes of the latter. And, besides, they are much more entertaining.

List of publications ordered printed by the 50th Congress, in excess of the "usual number."

WASHINGTON, D. C.

UNITED STATES GOVERNMENT PUBLICATIONS.

MONTHLY CATALOGUE.

VOL. V. WASHINGTON, D. C., JUNE, 1889. No. 6.

Entered as second-class matter at the Post Office, Washington, D. C.

This Catalogue contains the titles of all the current official publications of the United States, including the reports and papers issued by Departments, Bureaus, Commissions and other organizations of the Government; all the documents printed by order of Congress—that is to say, the Executive Documents, Reports of Committees, Miscellaneous Documents, Journals, and Debates of both Houses; and in addition, the titles of all public and private Acts, Treaties, Maps, and Charts.

The arrangement of the titles is alphabetical, under authors' names as regards special treatises, and under topics as regards Congressional documents. At the same time the Departments, Bureaus, Commissions, etc., are credited with the works issued under their supervision. A general Index at the end of the volume.

Subscription price $5.00 per annum.

J. H. HICKCOX,
906 M. ST. W., WASHINGTON, D. C.

William Wesley & Son, 28 Essex Street, Strand, or, Trübner & Co., 57 Ludgate Hill, London, or, G. Hedeler, Leipzig, are authorized to receive foreign subscriptions.

The first part of the annual report of the Smithsonian Institution for the year beginning July, 1885, has just made its appearance. The second part, being the report of the National Museum for the same period, has not yet been issued.

It is very much to be regretted that many, if not most, of the would-be *valuable* reports of Government officials, especially those of a scientific character, are in effect largely depreciated by unseasonableness of publication. As a matter of fact only a very small number appear sooner than three years after date! The report of the United States Fish Commissioner for the year 1886 is not yet out, and it is said that not a line of the report for 1887 is in print. The latest printed reports of the United States Geological

Survey and of the Bureau of Ethnology are for the year ended June, 1886, and the same is true as to the report of the Coast and Geodetic Survey.

The Department of Agriculture keeps well to the front in the prompt issue of its serials and excellent character of material. The Divisions of Botany, Chemistry, Entomology, Forestry and Statistics, as will be seen by reference to this catalogue, have made important contributions to several economic subjects. The fourth part of "Food and Food Adulterants" completes the studies of the chemist of the Department on the subject of lard and lard adulterations. The true character of lard is shown, how it is made and how it may be distinguished from its imitations. In the same manner the substances used in adulterating lard have been studied and their properties described. The Forestry Division furnishes a report on the use of metal track on railways as a substitute for wooden ties; also results of experiments in wood seasoning. The Journal of Mycology, formerly a private enterprise, has been transferred to the section of Vegetable Pathology, beginning with volume five.

The new edition of the Army Regulations, for several years past in preparation, has been issued. It is a sapling in size, compared with its immediate predecessor.

A very practical bulletin (no. 33) of the National Museum is a catalogue of minerals and synonyms alphabetically arranged by Mr Egleston for the use of museums.

Mr. Fassig, of the Signal Office Library, makes an important contribution to bibliography. He has prepared a classified catalogue of the printed literature of meteorology, from the origin of printing to 1888. Part 1, which is devoted to Temperature, has been printed.

A calendar of the correspondence of James Monroe, prepared from the orignals preserved in the Department of State, is a neat quarto volume. Presumably it is not intended for general circulation but to facilitate researches in that Department.

"The problem of the Ohio Mounds," by Cyrus Thomas, and "Textile fabrics of ancient Peru," by W. H. Holmes, form two pamphlet additions to publications of the Bureau of Ethnology.

WASHINGTON, D. C.

UNITED STATES GOVERNMENT PUBLICATIONS.

MONTHLY CATALOGUE.

VOL. V. WASHINGTON, D. C., JULY, 1889. No. 7.

Entered as second-class matter at the Post Office, Washington, D. C.

This Catalogue contains the titles of all the current official publications of the United States, including the reports and papers issued by Departments, Bureaus, Commissions and other organizations of the Government; all the documents printed by order of Congress—that is to say, the Executive Documents, Reports of Committees, Miscellaneous Documents, Journals, and Debates of both Houses; and in addition, the titles of all public and private Acts, Treaties, Maps, and Charts.

The arrangement of the titles is alphabetical, under authors' names as regards special treatises, and under topics as regards Congressional documents. At the same time the Departments, Bureaus, Commissions, etc., are credited with the works issued under their supervision. A general Index at the end of the volume.

Subscription price $5.00 per annum.

J. H. HICKOOX,
906 M. ST. W., WASHINGTON, D. C.

William Wesley & Son, 28 Essex Street, Strand, or, Trübner & Co., 57 Ludgate Hill, London, or, G. Hedeler, Leipsig, are authorized to receive foreign subscriptions.

A glance over the following pages reveals the value and variety of economic subjects recently discussed by the collaborators of the Department of Agriculture and the United States Fish Commission.

In the reports printed with the annual report of the Commissioner of Agriculture for 1888, the leading articles of the Entomologist relate to the plum curculio, the hop-plant louse, the fluted or cottony-cushion scale insect, silk culture, the damage done by the ball worm of cotton to the tomato crop.

The Chief of the Bureau of Animal Industry gives results in the investigations of pleuro-pneumonia, hog cholera, and inquiry

in regard to the number and value of thorough-bred animals, the conditions and means of improving sheep husbandry.

The Chemist of the Department completes the investigation of lard adulterants, and recites further experiments in the manufacture of sugar.

The Botanist submits papers on the pastoral resources of Montana, or grape-vine diseases, the downy mildew of the potato, the diseases of the tomato, cherry, pear, plum, apple, peach, etc.

The Ornithologist submits special reports on Pheasants, the Sparrow Hawk, the short-eared Owl, the rose-breasted Grosbeak, an enemy of the potato bug, and on the food of Crows.

Articles on truck farming and ostrich farming conclude this well illustrated and attractive volume.

The report proper of the Commissioner of Fish and Fisheries for 1886, covering fifty-seven pages, reads rather ancient at this late date; but the appendices by Baird, Jordan, Goss, Eigenmann, Linton, Fewkes, Kostytscheff, Mauriac, and others, comprising a thousand or more pages, cover investigations of permanent value. The volume is, as usual, well illustrated.

UNITED STATES GOVERNMENT PUBLICATIONS.

MONTHLY CATALOGUE.

VOL. V. WASHINGTON, D. C., AUGUST-SEPTEMBER, 1889. No. 8-9.

Entered as second-class matter at the Post Office, Washington, D. C.

This Catalogue contains the titles of all the current official publications of the United States, including the reports and papers issued by Departments, Bureaus, Commissions and other organizations of the Government; all the documents printed by order of Congress—that is to say, the Executive Documents, Reports of Committees, Miscellaneous Documents, Journals, and Debates of both Houses; and in addition, the titles of all public and private Acts, Treaties, Maps, and Charts.

The arrangement of the titles is alphabetical, under authors' names as regards special treatises, and under topics as regards Congressional documents. At the same time the Departments, Bureaus, Commissions, etc., are credited with the works issued under their supervision. A general Index at the end of the volume.

Subscription price $5.00 per annum.

906 M. ST. W., WASHINGTON, D. C.

William Wesley & Son, 28 Essex Street, Strand, or, Trübner & Co., 57 Ludgate Hill, London, or, Felix L. Dames, Berlin, are authorized to receive foreign subscriptions.

TESTS OF IRON AND STEEL.

The report on tests of iron and steel and other materials for industrial purposes made at the Watertown arsenal during the year ending June 30, 1886, has been published in two volumes, with illustrations. Some of the most interesting were the continuation and completion of the tests of steel-plate riveted joints, and a series of brick piers. Also the commencement of a series of temperature tests, the object of which is to investigate the effect of different degrees of heat upon the strength and elastic limit of iron and steel bars. Also tests of railway-car axles which have been run different lengths of time. Also a series of tests on the compression of metals and chemical salts in a hollow cylinder. This re-

port is the seventh, beginning with 1879. The whole series is comprised in nine volumes.

NAVAL INTELLIGENCE.

The Office of Naval Intelligence has issued Number 8 of the General Information Series, the general subject being, Naval Mobilization and Improvement in Materiél. The systems existing in England, France, Germany, and Italy for rapid naval mobilization are described. Also the English, French, Italian, and Spanish manœuvres of 1888, and the landing and subsequent operations of the naval brigade of the North Atlantic. Another chapter presents a graphic review of the changes which have taken place in naval opinion concerning the distribution of armor on war ships. Thirty-three pages are devoted to a review of the development of the resources of the United States for the production of war material. "Absolutely dependent in 1886 upon European manufacturers for the supply of heavy-gun forgings, armor-plates, steel shafting, rapid-fire guns, and torpedoes, the country, in 1889, finds within its territory the plant ready for producing every component part of the modern war ship." The latest developments of the high-power gun, fish-torpedo, naval gunnery, marine propulsion, naval electric plant, are described, and the interesting volume concludes with notes descriptive of the recent progress in design, construction, and performance of naval vessels, and in their armament, equipment, and machinery, together with some interesting data relating to the manœuvring powers of ocean steamers.

BIBLIOGRAPHY.

In Bibliography the Government is honored by the tenth volume of the Index Catalogue of the Surgeon-General's Office, bringing the work to *pfutsch*.

Mr. Pilling adds another number to his series of Indian linguistics, a Bibliography of the Muskhogean languages. It contains 521 titular entries, and includes "everything printed or in manuscript relating to the subject—books, pamphlets, articles in magazines, tracts, serials, etc., and such reviews and announcement of publications as seemed worthy of notice." Four hundred and sixty-nine of the five hundred and twenty-one works described have been seen by the compiler. The dictionary plan is followed

"to its extreme limit." Not the least valuable part of Mr. Pilling's book is his concise *biographical* work.

Professor Gore, of Columbian University, after several years of diligent research, has completed, and the United States Coast and Geodetic Survey has published, his Bibliography of Geodesy. This work is superior to any on the same subject, not excepting that of Dr. Börsch, of Berlin, which was printed in the early part of the present year. It embraces between seven and eight thousand titles, arranged under authors and subjects, with numerous notes. A valuable feature (and the same as to Mr. Pilling's Bibliography) is the directory of the ownership of the works cited.

The works above referred to, along with Mr. Fassig's Bibliography of Meteorology (already noticed), the Catalogue of additions to Scientific Library of the Patent Office, and brief bibliographies in several of the scientific serials of the Departments, make up a good record of Governmental bibliography for 1889. A catalogue of the Library of the United States Geological Survey—a valuable and fast-growing collection in competent hands—would reveal unexpected wealth, especially in the realm of Federal and State explorations and surveys.

BUREAU OF ETHNOLOGY.

The sixth annual report of the Bureau of Ethnology (printed four years after date) contains monographs on ancient art, by W. H. Holmes; on the Maya codices, by Cyrus Thomas; on Osage traditions, by J. O. Dorsey; and on the central Eskimo, by Dr. F. Boas. The report is printed in a style of elegance that should be imitated by other Government bureaus. Two separately printed monographs have been added to the publications of this Bureau, making the series to date as follows:

Perforated stones from California. By H. W. Henshaw. 1887. 34pp.
The use of gold and other metals among the ancient inhabitants of Chiriqui. By W. H. Holmes. 1887. 27pp.
Work in mound exploration of the Bureau of Ethnology. By Cyrus Thomas. 1887. 15pp.
Bibliography of the Siouan languages. By J. C. Pilling. 1887. 87pp.
Bibliography of the Eskimo language. By J. C. Pilling. 1887. 116pp.

Bibliography of the Iroquoian languages. By J. C. Pilling. 1888. 208pp.
Textile fabrics of ancient Peru. By W. H. Holmes. 1889. 17pp.
Problem of the Ohio mounds. By Cyrus Thomas. 1889. 54pp.
Bibliography of the Muskhogean languages. By J. C. Pilling. 1889. 114pp.
The circular, square, and octagonal earthworks of Ohio. By Cyrus Thomas. 1889. 35pp.

RAILWAY STATISTICS.

The statistics of railways in the United States for the year ending June 30, 1888, have been prepared by Mr. Henry C. Adams, Statistician of the Interstate Commerce Commission, and published as the first annual report on that subject. The tables consist of

1. Classification of railways and mileage.
2. Amount of railway capital.
3. Earnings and income.
4. General expenditures.
5. Payments on railway capital.

Returns are published from 1488 roads having a total of 149,901.72 miles. The States having over 6,000 miles of railways were Illinois, 9,707.56. Kansas, 8,437.20. Iowa, 8,230.35. Pennsylvania, 7,991.96. Texas, 7,901.63. Ohio, 7,523.46. New York, 7,488.15. The volume of 400 pages is handsomely printed and full of valuable information.

RIVERS AND HARBORS.

A much needed compilation of the Laws of the United States relating to the improvement of Rivers and Harbors, from 1790 to 1887, has been made [by Mr. P. J. Dempsey] under the direction of Col. J. G. Parke, Colonel of Engineers, War Department. The volume contains in addition to the Laws, which are arranged chronologically, a tabulated statement of each annual appropriation and allotment for each improvement by States, together with a statement giving the total annual amount for all the improvements by States.

PANAMA CANAL.

The Intelligence Report of the Panama Canal, by Lieut. C. C. Rogers, contains a detailed account of construction and finance gathered from personal observation and official sources. It is liberally illustrated.

MONTHLY CATALOGUE.

VOL. V. WASHINGTON, D. C., OCTOBER, 1889. No. 10.

Entered as second-class matter at the Post Office, Washington, D. C.

This Catalogue contains the titles of all the current official publications of the United States, including the reports and papers issued by Departments, Bureaus, Commissions and other organizations of the Government; all the documents printed by order of Congress—that is to say, the Executive Documents, Reports of Committees, Miscellaneous Documents, Journals, and Debates of both Houses; and in addition, the titles of all public and private Acts, Treaties, Maps, and Charts.

The arrangement of the titles is alphabetical, under authors' names as regards special treatises, and under topics as regards Congressional documents. At the same time the Departments, Bureaus, Commissions, etc., are credited with the works issued under their supervision. A general Index at the end of the volume.

Subscription price $5.00 per annum.

J. H. HICKCOX,
906 M. ST. W., WASHINGTON, D. C.

William Wesley & Son, 28 Essex Street, Strand, or, Trübner & Co., 57 Ludgate Hill London, are authorized to receive subscriptions in Great Britain.

The Album of Agriculture consists of graphic illustrations of statistics. There are sixteen maps of the United States presenting by colors and figures such topics as the following: Percentage of unoccupied and of farm lands; acreage of the leading cereals per 1,000 acres of superficial area; yield of the leading cereals per acre; average value of cattle in each State; average value of lands; and a color-key showing in each State the proportion of farms cultivated by proprietors, by tenants paying money rent, and by tenants paying share of produce. The Album is an ingenious and attractive method of interpreting statistics.

Dr. Herman proposes to issue at irregular intervals a serial containing notes on North American fauna. Nos. 1 and 2 were issued [illegible]

MARRIAGE AND DIVORCE.

The Commissioner of Labor has just printed the results of his investigations in the subject of marriage and divorce in the United States and certain countries of Europe. The volume, of over 1,000 pages, contains statistics, regulations, and a large amount of miscellaneous matter based mainly on the experience of twenty years last past. This is the first general compilation of facts and statistics on this much-talked-of subject, and the volume will have a permanent value. Congress has not yet ordered an edition for general distribution, but the Commissioner will doubtless be glad to respond to reasonable requests to the extent of his ability to do so.

GREAT CIRCLE SAILING.

The present state of the science of great circle sailing is presented in a recent work by Mr. G. W. Littlehales. "It consists of an exposition of graphical and analytical methods embodying certain principles relating to the great circle, as applied to navigation, and gives publicity for the first time to several of the most convenient and useful methods yet devised." Published by the Hydrographic Office, Navy Department.

The Hydrographic Office has added to its list of publications on sale the monthly Pilot Chart of the north Atlantic. Price 20c.

FISH COMMISSION BULLETIN.

The Bulletin of the United States Fish Commission will hereafter be issued in an enlarged form. The distribution of *signatures* will be discontinued, but completed, papers will be issued to collaborators and others interested in advance of the publication of an entire volume. Mr. Charles W. Smiley, who formerly edited the Bulletin, has been invited to take charge of the Fisheries section of the Census Bureau.

GOVERNMENT PUBLICATIONS,

AND INFORMATION CONCERNING SAME, SUPPLIED BY

J. H. HICKCOX,
906 M St. w.,
WASHINGTON, D. C.

UNITED STATES GOVERNMENT PUBLICATIONS.

MONTHLY CATALOGUE.

VOL. V. WASHINGTON, D. C., NOVEMBER, 1889. No. 11.

Entered as second-class matter at the Post Office, Washington, D. C.

This Catalogue contains the titles of all the current official publications of the United States, including the reports and papers issued by Departments, Bureaus, Commissions and other organizations of the Government; all the documents printed by order of Congress—that is to say, the Executive Documents, Reports of Committees, Miscellaneous Documents, Journals, and Debates of both Houses; and in addition, the titles of all public and private Acts, Treaties, Maps, and Charts.

The arrangement of the titles is alphabetical, under authors' names as regards special treatises, and under topics as regards Congressional documents. At the same time the Departments, Bureaus, Commissions, etc., are credited with the works issued under their supervision. A general Index at the end of the volume.

Subscription price $5.00 per annum.

J. H. HICKCOX,
906 M. ST. W., WASHINGTON, D. C.

William Wesley & Son, 28 Essex Street, Strand, or, Trübner & Co., 57 Ludgate Hill, London, or, Felix L. Dames, Berlin, are authorized to receive foreign subscriptions.

The papers of the International Marine Conference described in this number embrace all the permanent matter printed. It was the object of the Conference to revise and amend the rules, regulations, and practices concerning vessels at sea, and navigation generally, and the International code of flag and night signals. A report of its proceedings will be submitted to Congress. The Conference was in session in Washington from October 16 to December 31, 1889.

The annual reports of the Executive Departments and Bureaus for 1889, which have made their appearance since June 30th,

have been grouped in this issue of the Catalogue for more convenient reference. A very few are not yet printed, but will be described in a later number.

Notwithstanding the delay in the appearance of the Annual Report of the Smithsonian Institution for 1887, the numerous papers accompanying that report will be found of unusual and permanent value.

CATALOGUE.

NOVEMBER, 1889.

WASHINGTON, D. C.

UNITED STATES GOVERNMENT PUBLICATIONS.

MONTHLY CATALOGUE.

VOL. V. WASHINGTON, D. C., DECEMBER, 1889. No. 12.

Entered as second-class matter at the Post Office, Washington, D. C.

This Catalogue contains the titles of all the current official publications of the United States, including the reports and papers issued by Departments, Bureaus, Commissions and other organizations of the Government; all the documents printed by order of Congress—that is to say, the Executive Documents, Reports of Committees, Miscellaneous Documents, Journals, and Debates of both Houses; and in addition, the titles of all public and private Acts, Treaties, Maps, and Charts.

The arrangement of the titles is alphabetical, under authors' names as regards special treatises, and under topics as regards Congressional documents. At the same time the Departments, Bureaus, Commissions, etc., are credited with the works issued under their supervision. A general Index at the end of the volume.

Subscription price $5.00 per annum.

J. H. HICKCOX,
906 M. ST. W., WASHINGTON, D. C.

William Wesley & Son, 28 Essex Street, Strand, or, Trübner & Co., 57 Ludgate Hill, London, or, Felix L. Dames, Berlin, are authorized to receive foreign subscriptions.

NOTICE: The index and title page of volume 5 will be issued separately.

The collection of papers published for the information of the International American Conference, includes several of special interest. It is expected that the proceedings will be printed after the adjournment of the Conference.

The Smithsonian Institution has recently added thirty-eight new titles to its series of valuable publications.

Among the more important issues of the month are:
Land Office Decisions, vol. 9.
International Code of Signals, New Edition.
Interstate Commerce Commission, 3d annual report.

In Congress, resolutions have been introduced and referred for printing 19,000 extra copies of the Annual Reports of the Smithsonian Institution and National Museum for 1888 and 1889; 26,000 copies of the address of Chief-Justice Fuller on the occasion of the commemoration of the inauguration of Washington; 400,000 copies of the Annual Report of the Secretary of Agriculture for 1889. Also a bill to provide for the preparation and publication of the classified abridgments of letters-patent granted by the United States.
